INSTALLATION STEPS

1. Separate fixture body from the Base by removing (4) Side Screws with supplied Hex Wrench and separating the Wire Terminals.
2. Drill Mounting Holes (4) on the wall according to the dimensions on the Base.
3. Make proper electrical connections (black to hot "L", white to neutral "N", ground to "GND") in the J-box (by others). If needed please change into Small Seal Ring or 3-hole Seal Ring accordingly in the Wire Outlet.
4. Secure Base to the Wall using (4) Screws and Expansion Screws provided or other fasteners by others.
5. Secure Fixture Body to the Base with the removed (4) Side Screws. Pay attention that no wires get pinched.
6. Seal around the top and side perimeter between the fixture and the wall surface with weather resistant caulking (by others). Pay attention to leave space of about 1" at bottom, which should be left un-caulked to prevent moisture build-up.

* Please make sure the J-box width is not bigger than the fixture width of 2.36"(60mm). Otherwise, please cover the aperture and make waterproof treatment. We are not responsible for the defectives because of incorrect installation.
